

**Step 10 : Row3**, continue your work on each side of the bracelet by adding faceted beads.

**Step11 :** You can see that the faceted beads now frame the group of 2 cubes of the first row.

**Step 12 : Row 4**, we add cubes next to every cube of the row2. On the picture you can see how to place the first cube of the row 4. The thread cross through the faceted bead under.

**Row5**, We end by a row of cubes on each side of the faceted beads of row3.

**Tips:** to stop the thread, pass in several beads by changing the direction of the work. Do the same thing if you have to restart with a new thread. To finish the work well and strengthen it, do not hesitate to weave a second thread back through the beads. Burn the ends of remaining threads.
