

La table x 4

Complète les opérations pour indiquer le nombre de canetons :

$$\text{.}4\text{.} + \text{.}4\text{.} + \text{.}4\text{.} + \text{.}4\text{.} + \text{.}4\text{.} = \text{.}20\text{..} \quad \text{Il y a } 20 \text{ canetons.}$$

ou $\dots 5\dots \times \dots 4\dots = \dots 20\dots$

$$\text{.}4\text{.} + \text{.}4\text{.} + \text{.}4\text{.} = \text{.}12\text{..}$$

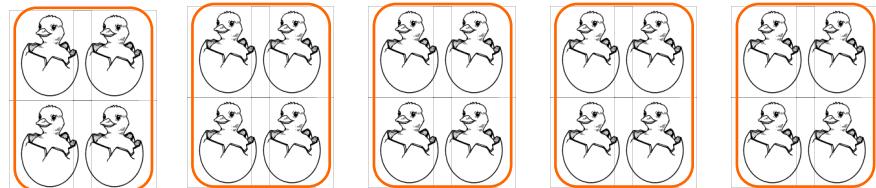

ou $\dots 3\dots \times \dots 4\dots = \dots 12\dots$

Il y a **12** canetons.

Table du 4 :	$5 \times 4 =$ 20
$0 \times 4 =$ 0	$6 \times 4 =$ 24
$1 \times 4 =$ 4	$7 \times 4 =$ 28
$2 \times 4 =$ 8	$8 \times 4 =$ 32
$3 \times 4 =$ 12	$9 \times 4 =$ 36
$4 \times 4 =$ 16	$10 \times 4 =$ 40

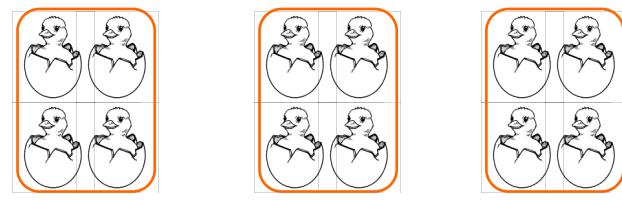

La table x 4

Complète les opérations pour indiquer le nombre de canetons :

$$\dots + \dots + \dots + \dots + \dots = \dots \quad \text{Il y a } \dots$$

ou $\dots \dots \times \dots \dots = \dots \dots$ canetons.

$$\dots + \dots + \dots = \dots$$

ou $\dots \dots \times \dots \dots = \dots \dots$

Il y a **...** canetons.

Table du 4 :	$5 \times 4 =$
$0 \times 4 =$	$6 \times 4 =$
$1 \times 4 =$	$7 \times 4 =$
$2 \times 4 =$	$8 \times 4 =$
$3 \times 4 =$	$9 \times 4 =$
$4 \times 4 =$	$10 \times 4 =$
