RESIDENT EVIL 3 VS RESIDENT EVIL 5 – BY LAMBERT MAUDOU

RESIDENT EVIL EXTINCTION

Resident evil extinction is a science fiction action movie and the third film of the Resident Evil series.

The heroine of the film, Alice (Milla Jovovich), along with a group of survivors from Raccoon City, attempt to travel across the Mojave Desert. There is a new hope for the group: Alice finds a notebook, which claims of a "safe zone" in Alaska.

EVIL APOCALYPSE

This Resident Evil is a bit more centred on action and on fighting scenes unlike the first one, but scares still a little, as we expect from a Resident Evil. It's a good action movie, which is in line with the second one, Resident Evil Apocalypse. The story is in the continuity with the first and

second one, but after Resident Evil Extinction it becomes more complicated and a bit far-fetched.

The film was released in 2D, 3D and IMAX 3D.

This Resident Evil is too much centred on the 3D with a lot of action and effects to
