

## 'CARD CD' and 'CUBE'

Theme: 'Halloween'

Exclusively for INFINIMENTSCRAP

by BrigitteG, Guest DT for October

<http://brigittescrap.canalblog.com>

**TO MAKE YOUR CARD,** you will need:

- 1 piece of scrap paper (ideally double sided) (here i've chosen Cosmo Cricket 'Haunted/ Macabre')
- 1 CD
- 10 eyelets matching with the colour of your paper
- a piece of thin ribbon (approx. 30cm, 3mm wide (so it goes through the eyelets)
- micro beads 'Silver'
- Shrinky dink pastic
- Black embossing powder
- Ink: Stazon 'Jet black'
- Alcohol based ink 'Purple'
- 1 cotton bud or a fine brush to apply/colour the alcohol ink
- Blings
- Ruler, pencil, scissors, glue, Gloss, eyelet tool/hammer ect...

Method:

1) Take your scrap paper and use the most printed sided for the outside and the plain side for the inside of the card.

Measure/fold a piece of 12cm Height for 6cm x 12cm x 6cm Length.

2) Place your CD in centre and fold over the left and right side over it. Then trace the shape of the circle with your pencil, then trim with your scissors. Ink the edges.

Towards the bottom of this round card, punch 5 holes on each side, secure your eyelets with your tool and hammer.

3). Stamp the inside (of card), left and right with stamp background 'Fond Granite' de Gallou.  
Stamp the outside (of card) with 'l'arabesque 7' (swirl) and emboss with black embossing powder.

4). For your CD: Stamp your images with Stazon ink 'Jet black' referring to photograph for position of each stamps used.

5) Colour carefully 'L'arche de halloween' ('Halloween arch') with a cotton bud or your fine paint brush (dab the ink rather than brush over the design otherwise the alcohol ink will rub the stazon ink off)

- 6) Place your CD in centre of your round card, adhere it.
- 7) Stamp the 'Croix de Maodren' (the Cross) on a piece of shrinky dink plastic, heat with heatgun, once it is shrunk, leave it to cool down.

- 8) In centre of your CD, apply a fair amount of gloss (to hide the cd prints ect...), then sprinkle with your silver micro beads, then place your cross (made of shrinky dink) over it, leave it to dry on a flat surface.
- 9) To finish, stamp the background 'Fond de Gallou' on each opening of the round card (inside). Stamp twice the 'bougeoir' ('candelabra'), cut them out, mount them on double sided foam tape and place on each side of the opening of your card (as shown below)...

10) Lace your ribbon through your eyelets and... voila ! (your card is finished:) !!

**TO MAKE YOUR CUBE,** you will need:

- Left over of your scrap paper (here Cosmo Cricket 'Haunted/Macabre')
- Plain cardstock (a matching colour with your scrap paper. Here, i've used 'Cream')
- 2 extra thick pieces of cardstock (or chipboard) approx. 4,5 inch x 13,5 inch (or 11,5 cm x 34,5cm).
- Embellishments: small black flowers, adhesif bling/diamantes, ribbon ect...
- Embossing powder 'Black'
- Shrinky dink plastic (to shrink some images as embellishments if you wish)
- Stazon Ink 'Jet black'
- Masking tape
- Black acrylic paint
- Ruler, scissors, glue, heat gun for embossing ect....

**Method:**

1) Take your 2 pieces of extra thick cardboard of approx. 4,5 inch x 13,5 inch (or 11,5 cm x 34,5cm). (I have printed my photos in very small format for this project, however if you are printing your photos on normal size, make your cube bigger (approx. 6inch square or 15,5cm square),

- 2) Measure/divide those 2 pieces in 3 equal parts. With a sharp tool (or back of scissors), score your marks making 3 folds.
- 3) Referring to photographs, place your 2 folded pieces to form a cube.

- 4) Attach/adhere each joints with some masking tape to give some strength to your cube.

5) Paint all edges with acrylic paint.

6) Once your cube is put together and painted, measure and cut 5 pieces of plain cardstock approx. 10cm x 10cm. Those 5 pieces will be used to scrap the 5 visible surface of your cube. Stamp all your pieces with a background ... i used 'Fond granite' and 'Cemetery' ect... or you can use your left overs scrap papers...

7) Here: Showing you a little technique to roll your paper: with your cutter, cut a cross then a slash in middle of this cross, and roll around a piece of bamboo skewer ect... then... ink as you wish....

8) Ink, Distress and decorate as you wish according to your photos or theme for your cube.

and VOILA !! your cube is finished !!

Have fun scrapping it !! :)
