## Social engineer Resume

My vision, my plan to change  
the society - My manifesto...

I am looking for funds - **Support me!**

### THE "EL4DEV" PROGRAM IS LOOKING FOR SPONSORS

How would you like to participate in a major and innovative initiative for societal change at the international level? The EL4DEV program seeks operational and financial support from one or more public figures. Does your state of mind match our values? We would love to have you as ambassadors.

### WHO AM I?

My name is Paul Elvere Valérien DELSART. I have created a mechanism that will have a real and positive impact on the world - My program is promising and key players, already canvassed, are just waiting for a trigger to intervene in it. I am looking for individuals who share my vision and my optimism to act in the program.

<https://www.paul-elvere-delsart.net/my-vision-to-change-the-world-my-manifesto>

### WHAT IS THE EL4DEV PROGRAM?

Centric network program of positive social engineering and societal change - Multidisciplinary participatory engineering program

<https://drive.google.com/file/d/1fY5knN7V40irNIWFwg8GPBx3GNqoocbM/view>

<https://www.paul-elvere-delsart.net/programme-el4dev-el4dev-program-paul-elvere-valerien-delsart>

### WHAT IS LE PAPILLON SOURCE?

"LE PAPILLON SOURCE" is an alternative and ethical society project whose foundations and philosophy are inculcated in the participatory design, collective construction and operational management of experimental ecotourism, agro-climatic, educational and interconnected places throughout the world . It is a sub-program of cities and agro-climatic plant complexes that showcases a better future and then vectors of social peace and international cooperation - In short, a tool to channel all the creative, intellectual, operational and financial power of nations around the world

### EL4DEV PROGRAM POSITIVE SOCIAL ENGINEERING

Our societies are social constructions which only hold together by tacit agreements. Changing the world requires methodology, rigor and determination. It takes processes. - The vision of Paul Elvere Valérien DELSART

<https://drive.google.com/file/d/1JT1V1t8qfi9leddy2c31MtyBEGPnv-B/view>

How would you like to participate in a major and innovative initiative for societal change at the international level? The EL4DEV program seeks operational and financial support from one or more public figures. Does your state of mind match our values? We would love to have you as ambassadors.

### SELF-MANAGED FOOD BANKS CITIES OR AGRO-CLIMATIC CITIES

These self-managed cities will therefore be showcases for future progress in the modernization of the food security system, the improvement of agricultural, water and ecological policies, geoeengineering, agricultural advice, the transfer of new and efficient green technologies then training through experience - pilot cities which thus pave the way for a new model of community functioning and management. This ethical model is very effective and is applicable to all municipalities around the world.

<http://www.el4dev.com/papillon/cities-autogerees.html>

<https://drive.google.com/file/d/1XcYkYJ02s0QQqFOCXw7FMQPfSE5RoUtq/view>

### THE MUNICIPALITIES COUNTER-ATTACK

Sub-program for the development and empowerment of municipalities in France and around the world, in particular the smallest (less than 5,000 inhabitants), offering them decentralized cooperation and grouping through the constitution of a societal EIG. This program is also the main (but not the only) funding mechanism for future cities labeled LE PAPILLON SOURCE.

<https://drive.google.com/file/d/1uwCg29X01ejKU0tmSjSsVySwPdRBDRJZ/view>

### THE PLANT/GREEN/VEGETAL CALDERAS

These are the key modules, initiating elements, the generators of the future agro-climatic cities labeled LE PAPILLON SOURCE - These are vertical eco-landscaped plant complexes intended to emit positive vibratory waves in their surroundings - These can resemble vertical farms (because they also have an agricultural function) without being similar to them. These include lush sanctuary forest gardens that can be visited in 3 dimensions and refuges / landmarks for birds and bees. These structures use electro culture (including magneto culture), permaculture, ferroelectricity, piezoelectricity, shape waves, chembusters, etc.

### MANIFESTO FOR A PARTNERSHIP BETWEEN LE PAPILLON SOURCE EL4DEV AND RAILCOOP

"LE PAPILLON SOURCE" relies on the support of the railways to develop its vector initiatives for social peace and societal diplomacy. "EL4DEV" plans to build agro-climatic plant complexes (plant calderas) along the BORDEAUX-LYON railway line to begin with. Municipalities and other local authorities have already become members; this represents an excellent opportunity for the EL4DEV program to propose to the municipalities its project to create a national societal EIG. The company "RAILCOOP" could serve as a means to reach the targeted municipalities.

<https://drive.google.com/file/d/15NoML7mkpZ1B2qUZCUF1GB-v0xjOvWiy/view>

### TRANSNATIONAL INTELLECTUAL AND ARTISTIC COOPERATION EVENTS

A series of transnational online events of mobilization, team cohesion and collaborative engineering in order to design multifunctional, interconnected, alternative, 100% ecological and agricultural cities / complexes  
A series of conferences, meetings and workshops, online, around the world, in which artists come together and collaborate around specific themes.

<https://www.paul-elvere-delsart.net/transnational-artistic-cooperation-initiatives-taci-transnational-online-symposia>

### THE EL4DEV INFORMATION SYSTEM - THE EDUCATIONAL BIG SMART DATA OF THE PROGRAM

EL4DEV software will be accessible online. They are educational, scientific, simulation, management, governance, evaluation, communication and entertainment tools. Like the Strategic Deployment Tool, they are massively multi-user, collaborative and interconnected

### "LE PAPILLON SOURCE", NEW INTERNATIONAL RELATIONS - SOCIETAL DIPLOMACY

A counter-power to economic power must respond by placing itself on the same level of organization, at the global and no longer national level, by unifying and synchronizing actions, at the level of groups of peoples, of nations weighing a weight sufficient in global economic flows.

The stake is to shape, by a EL4DEV innovative process of "societal" geostrategy, new political-societal unions different from the current political-economic unions.
