- > **Cultivated space** : 110 ha
- > **Production** : 500 000 btles
- > **Soil(s)** : clay limestone, pebbles

## The philosophy of the domain :

Established in 1789, the domain is the oldest estate of southern Ardèche. Located between lbie and oak forests, the vineyard grows wonderfully in under a clay-limestone soil, covered with pebbles deposited by the stream: lbie. This family business was born in 1974 thanks to Jacqueline and Francis. It was a very important turning point for the Ardèche vineyards. Becoming rare independent winegrowers at that time. Today, children put their talents to this family business. Each has a well-defined role.

## Mode of driving of the vineyard, wine-making and ageing :

For the vineyards : Stéphane manages this part. Mastering it well, it works close to "organic culture" (no herbicides, contact treatment with copper, organic fertilizer ...). The plants are selected according to criteria (compatibility with the floor, durable, yield ...). The average production area is 42 to 45 hectoliters per hectare, for a normal year. For the wines, it's Gregory. His philosophy is to intervene as less as possible into the wine. We must let the nature working !

For the commercial part : David aims to establish a good quality / price ratio. The service must be impeccable and the consumer must have access to a very good wine for a very reasonable price.

Nowadays, the domaine de Vigier has a range of wines which is typical from its terroir. Each of these wines represents the work done upstream and downstream, in a real desire to satisfy the consumer.
